Item # Bracket Clocks, Bracket Clocks

Bracket Clocks

Bracket style clocks are provided in a variety of sizes and styles with corner and sidewall mountings. Traditional and Modern styles are available with internal back-lighting or front-lighting with neon or low voltage LED lighting.

All Bracket Clocks are built to customer specifications including sizes, hand & dial marker styles, lighting, addition of optional items, etc. Contact Elderhorst Bells, Inc. for details.

"Bracket Clocks" are generally mounted to the front wall or corner of a commercial building and usually have 2, 3, or 4 clock faces. The clock housings often also include space for signage. The clock dials and signage are generally back-lit or front lighted. All of our Bracket Clock styles may be modified in size and configuration to the customer's specifications.

All of our Bracket Clock housings and mounting are custom fabricated from aluminum sheet with heavier aluminum framing inside for long term strength and durability. The clock movements and controls are quartz based with lithium battery backup for automatic time correction following power failure, and automatic daylight savings time correction.
