## EB-105 CLOCK MOVEMENT

(SUITABLE FOR EXTERIOR CLOCKS TO 72" DIAMETER)

One EB-105 clock drive movement required for each clock face. The EB-series clock movements are built on an aluminum frame in a maintenance free design. The movements are driven by a 120 Volt, 60 hz, high-torque motor which is activated by the impulse type clock controller at one minute intervals.

The EB-200 SERIES Clock Controller is required for clock operation and to set clock hands.

EB-105 clock movement - (other configurations and mountings available)
