I 134Z CLOCK MOVEMENT – 4 WAY MINUTE IMPULSE CLOCK MOVEMENT

All Measurements Above In Millimeters

The I134 4 way clock movements are designed for use with dial gear sets and are built on a composite frame in a totally maintenance free design. The movements are driven by a 120 Volt, 60 hz, high-torque motor which is activated by the impulse type clock controller at one minute intervals.

The EB-200 Series Clock Controller is required for clock operation and to set clock hands. This movement is also available in a 230V/50HZ configuration.
